SUMMARY

Software Engineer II and frontend UI lead who reduced Unlocked Offers p95 from 3.8s to 1.7s (55%) and drove a 12% relative lift in Save the Sale conversion lift on Verizon's Next-Gen Digital platform (~60k cart sessions/day). Tech lead for a 4-engineer UI pod across 6 micro-frontend repos, specializing in Module Federation, Core Web Vitals, and A/B experimentation on revenue-critical checkout flows.

EXPERIENCE

Software Engineer II (Frontend) · Tech Lead

Dec 2023 – Present

Verizon

Hyderabad, India

- Led frontend strategy for a 4-engineer UI pod across 6 micro-frontend repositories, running system design, grooming, and code reviews.
- Authored a Module Federation RFC adopted as the squad standard for cross-repo remote entry contrats and semver upgrade paths.
- Merged 76 MRs in H1 2026 and coordinated frontend delivery with backend, QA, and feature-flag teams.
- Built Next.js UI for multi-device Phone/Watch/Tablet configurator and checkout journeys, preserving state across cross-category flows and delivering an 18% lift in Watch+Phone attach rate.
- Re-sequenced Flyout Cart and Unlocked Offers API calls to meet sub-2-second p95 targets; triaged 25+ Blocker/Critical defects and maintained zero carry-forward defects across releases.
- Moved plan-eligibility data behind a server-side rendering boundary, closing a security finding; enforced Sonar and coverage gates with zero open security findings on squad-owned surfaces.

Software Engineer I (Frontend)

Jul 2022 – Nov 2023

Verizon

Hyderabad, India

- Delivered promotion and digital-sales UI across bundle builder, app-exclusive, strategic-offer, and winback experiences, including sticky CTAs, redirects, offer visibility, and promotion tracking.
- Improved delivery quality through reusable UI functions, >80% unit coverage, staged-environment validation, and developer documentation and knowledge transfer.

Software Engineering Intern (Frontend)

Feb 2022 – Jun 2022

Verizon

Hyderabad, India

- Joined the Digital Sales UI team, learned React through training and on-the-job delivery, contributed to promotion stories, and adopted team code-quality standards.

PROJECTS

ShopForge — Micro-Frontend E-Commerce Demo

GitHub

- Built a reference e-commerce architecture for independently deployed catalog and cart surfaces: composed a Next.js host iwth two Module Federation remotes, shared React/TanStack Query/Zustand state, and cart/promotion flows; achieved 919ms catalog-route LCP and 0 CLS under Lighthouse CI with 49 unit/E2E tests.

ConfigStack — Multi-Device Product Configurator

GitHub

- Built a reference multi-device checkout for Phone/Watch/Tablet flows where selections must survive navigation and refresh: implemented Next.js, Zustand, Tanstack Query, SSR-safe hydration, and shared validation; covered 21+ dependency-validation cases and a 3-stage funnel with persisted same-browser sessions and 41 unit/E2E tests.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML, CSS

Frontend: React, Next.js, TanStack Query, Zustand, Tailwind CSS

Architecture & Protocols: Micro-Frontends, Module Federation, SSR, REST APIs, Feature Flags, A/B Testing

Web Standards & Performance: Design Systems, Accessibility (WCAG 2.1), Web Performance, Core Web Vitals

Build, Testing & Tooling: Vite, Jest, Playwright, Lighthouse CI, GitLab CI, Sonar, Kibana, Git

Backend exposure: Node.js, Express.js, MongoDB, Mongoose

EDUCATION

SASTRA Deemed University

B.Tech, Information & Communication Technology; CGPA 8.12/10

Thanjavur, India

2018 – 2022
